Insights from this scintillating conversations

Leveraging intelligence, inherent skills, hard work and dedication to escape from poverty

Honesty, a creative mind, innovation, continuous improvement and hard work are critical for success

No tolerance for inefficiency, no compromise on quality and perfection

Investing a percentage of profits- with calculated risks -to continuously upgrade machinery and technology

Compensated customers in case of delay in delivery; this helped earn their trust, confidence and repeat business

The next-gen entering the industry must learn to be patient, accept failure and learn from it, ensure mistakes are not repeated and cultivate focus and concentration on whatever one undertakes

Message to GJ industry: Don't be disheartened and discouraged by any disadvantage or negative development. Have faith in the GJ industry. Till women exist, the jewellery industry will exist!
